High/Low – the football way

Instant score is one of the most popular games on the Sport Cloud. Maybe because of its simplicity. There is only one rule:

- Do not lose!

Sport Cloud system automatically calculates a fixture (teams are from the real world) and player task is to guess match outcome. If player's prediction is correct the pot is doubled and the next fixture is generated. Player can request a payout or simply continue to play.

There is some help at the beginning (probability) but the higher the pot is less help is available.
